

FACILITIES UPDATE

Parish Pastoral Council Meeting: July 12, 2016

Building Committee

Next quarterly bulletin update will be in mid-August.

Engineering contract was signed with Pace Collaborative on May 23rd. Pace is working on Sanctuary design, and the Church is preparing addendums to add Cooling Tower replacement, Chapel lighting, Family Room lighting and the Kitchen equipment/hood replacements to the contract. Pace has already scoped the work out and is waiting a signed change. We received preliminary design proposals for the Chapel and Family Room lighting yesterday. The Cooling Tower and Kitchen proposals will follow shortly.

Building Committee, Fr. Gaudy and Sylvia will meet with three sound companies next week to hear proposals and qualifications so that we can select one to do the sound and AV portion of the Sanctuary work in conjunction with the Pace Collaborative.

Glenn is evaluating the construction schedules to bring them in line with design completions and building usage since we have now received event schedules for the Church calendar through June, 2017. This information will be in the next quarterly update.

We are planning a town hall meeting in the mid-October timeframe to discuss work proposed for the Sanctuary.

Other Facilities Issues

We completed a contract for miscellaneous electrical repairs inside and outside of the building.

We received our ministry lists from the recent ministry fair and are notifying individuals to get them started in their ministries. We can use the help on our grass cutting ministry which is still impacted by unavailability of one of our team leaders.
